

HTS-CC Cone Cradle

HTS Systems® Cone Cradle traffic safety cone deployment system reduces accidents, docking collisions, worker injuries, property damage, corporate liability and insurance costs! The HTS-CC allows route drivers to get it done safer, faster and easier, especially in bad weather! The Cone Cradle has been met with incredible amount of excitement and enthusiasm by fleet professionals, truck body manufactures and route delivery drivers. HTS-CC is a safer, easier and faster deploys method, requires less physical effort, zero climbing, and reduced liability and prevents bacterial cross-contamination.

HTS Systems' patented pending HTS-CC Cone Cradle traffic safety cone rack benefits:

- Safer Handling
- Fleet Affordable
